

FLEXIBLE METAL PROFILE SYSTEM

PVC Simulated Standing Seam
Metal Roofing Systems

FLEXIBLE METAL PROFILE SYSTEM

IB Flexible Metal Profiles are specially designed to provide the aesthetic appeal of a standing seam metal roof. The IB Flexible Metal Profiles are constructed of high quality PVC polymers and plasticizers similar to what IB PVC membrane are made of and are designed and extrusion formed to enhance the look of an IB Roof.

Inherent flexibility provides maximum versatility in adapting to a variety of flat, radius, and curved substrates. IB Flexible Metal Profiles are installed utilizing hot air welding techniques in accordance with IB's installation guidelines and are available in a all of IB's standard PVC colors.

Order a Sample Kit!

Available Colors:

Tan

*White

Gray

*Cool Stone

Bronze

*Terracotta

Cool Sand

These colors match IB Roof Systems PVC membranes to make a color matched roof finish.

***Special Order**
