Advantages of IB Roof Systems PVC

Fire Resistance

- IB PVC membranes do not support flame. Once the flame source is removed, the membrane self-extinguishes.
- Rated Class A for fire resistance over non-combustible decks, offering peace of mind in fire-prone areas.

Highly Reflective

- IB PVC membranes reflect up to 90% of solar radiation when using Title 24 rated colors.
- This high reflectivity helps reduce energy consumption and cooling costs.
- Our White, Cool Sand, and Cool Stone membranes exceed CRRC standards.

UV & Weather Resistant

- Designed with a thicker, more durable top layer, IB membranes offer enhanced resistance to UV rays and weathering.
- This extends the lifespan of the roofing system, even in harsh climates.

Wind & Hail Resistance

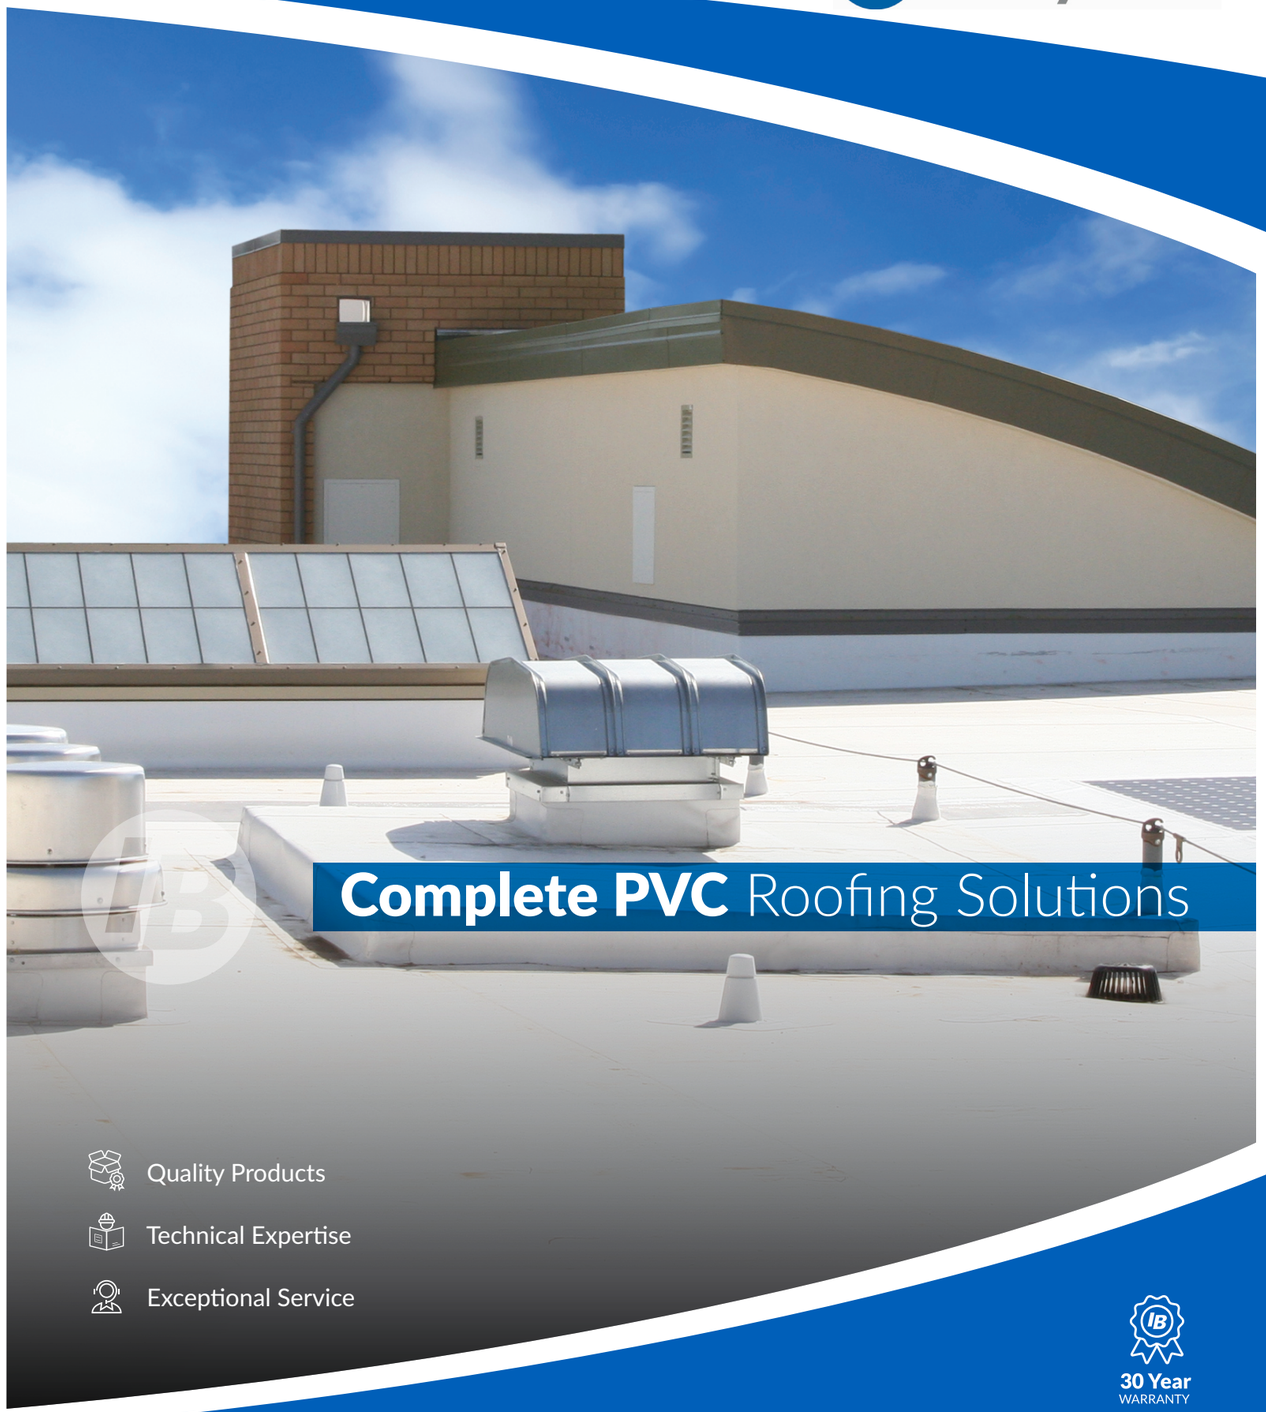

- Engineered for strength, IB PVC roofs provide superior wind uplift resistance.
- Ideal for buildings in challenging climate zones and Very Severe Hail (VSH) regions.
- Multiple FM-approved VSH assemblies are available for added protection.

Sustainable

- IB PVC membranes are recyclable and can be reclaimed for use in new PVC products.
- IB Roofing Systems offers the first 3rd-party validated carbon neutral roofing membrane on the market. Select Title 24 rated colors become carbon neutral after a short period*.

*Carbon neutrality calculated using the IB Carbon Calculator

What Makes IB Roof Systems Different?

For more than four decades, IB Roof Systems has built a reputation for reliability and innovation in the roofing industry. Our success is grounded in three core values:

- ***Quality Products***
- ***Technical Expertise***
- ***Exceptional Service and Support***

Quality Products

- Complete System Solution: IB Roof Systems provides a fully integrated roofing system. Our materials undergo extensive quality control and testing, far beyond typical industry standards.
- Superior Performance: Our membranes often exceed ASTM standards, delivering greater value and long-term durability.

- 30-Year Total System Warranties: Depending on project type and contractor status, we offer best-in-class warranties for peace of mind.
- Large In-Stock Color Selection: Choose from the widest range of color membranes to create a truly custom roofing solution.
- Custom Fabrication: We offer pre-fabricated components tailored to your project's unique needs, streamlining installation and ensuring precision.

Technical Expertise

- Expert Guidance: Our Technical Representatives work directly with contractors, offering tested and approved assemblies for optimal performance.
- On-Site Support: We provide hands-on technical assistance before, during, and after installation—including inspections, troubleshooting, and rooftop monitoring.

Exceptional Service & Support

- Knowledgeable Support Team: Our customer service and technical staff are fully trained and ready to answer your roofing questions.

- Authorized Contractor Network: Access to our PVC Pro and Master Pro applicators ensures your project is handled by fully trained, certified professionals.

We Bring Value to Your Building.
