

SPECIFY WITH CONFIDENCE

Built for Performance. Backed by Experience.

Choosing IB Roof Sytem's PVC means choosing:

- Over four decades of proven PVC manufacturing expertise
- Thicker weathering layer for added protection against the elements
- Long-lasting, recyclable roofing material
- Flexible membrane that performs in extreme climates
- High-performance coated scrim that prevents water absorption
- Superior resistance to chemicals, grease and rooftop contaminants
- Energy-efficient reflective surface options
- Complete system compatibility with accessories and components
- Excellent Customer Service and Technical Support

IB PVC is available in a wide range of colors and options, available to meet project specifications, including:

- 50-mil membranes
- 60-mil membranes
- 80-mil membranes
- Smooth and Fleece Back configurations
- KEE (Ketone Ethylene Ester) enhanced membrane options for higher level of chemical resistance

Available in multiple thicknesses, widths, lengths and colors with custom fabrication options. IB PVC provides a complete PVC solution designed for performance and ease of installation.

COMPLETE COMMERCIAL ROOFING SOLUTIONS

Reliability + Speed. When you need product on time with expert technical and customer support, partner with a manufacturer you can trust.

IB delivers a full portfolio of high-performance roofing technologies engineered for durability and system compatibility, including:

- PVC
- TPO
- Insulation and coverboards
- Liquid-applied and PMMA roofing systems
- Coordinated accessories and components

IB products provide the solutions needed to protect commercial and residential assets with systems designed to perform over decades.

PVC Roofing Systems

Performance

Durability

Integrated System Confidence

30 Year
WARRANTY

Commercial Roofing Solutions
Featuring up to 30 Year Total System Commercial Warranties

IB Roof Systems delivers commercial roofing technologies engineered to perform over decades. As the recognized leader in PVC roofing, IB Roof Systems has been manufacturing high-performance PVC membranes for more than 45 years, setting the standard for durability, reliability and long-term performance. IB PVC roofing solutions are designed to withstand the toughest environments. Built for longevity and sustainability, these membranes provide exceptional resistance to harsh weather, chemicals and rooftop contaminants, ensuring long-term protection for commercial buildings.

PERFORMANCE HIGHLIGHTS

- Excellent resistance to chemicals, grease and harsh environments

- IB PVC Roofing will self-extinguish when flame is source is removed

- IB offers a buyback reclamation program that recycles old membrane

- CRRC rated and compliant with California Title 24 solar reflectance and emissivity requirements, supports LEED SRI standards (White, Tan)

- ASTM D4434 Type 3 thermoplastic membranes

IB PVC is ideal for demanding applications including mission critical environments, restaurants, industrial facilities, healthcare environments, schools, data centers and commercial buildings requiring long-term durability and chemical resistance.

FULL SYSTEM COMPONENTS

- Insulation and polyiso options
- Coverboards
- Vapor barriers
- Heat-weldable accessories and custom-fabricated components
- Liquid flashing solutions

All components integrate seamlessly for long-term performance.

BACKED BY IB WARRANTY AND SUPPORT

- Up to 30-year warranties
- Dedicated technical support and onsite observer options
- Installation guidance and specification libraries
- Code compliance assistance
- Details for roof to wall transitions
- Peer reviewed and vetted engineering details
